

Community Sector COVID-19 Response Rapid Mapping Project

An overview of recent and planned work

COMPLETED

High level mapping of capacity and capability in the sector (*the dashboard*)

Collected a substantial set of initial data, including on FTE by location and service type, buildings, and vehicles.

Over 100 organisations provided data through this process.

COMMENCING

Contact sharing and ongoing data collection to inform resource sharing

Contact sharing - a way for organisation in need of staff or resources to talk to organisation who may have excess.

Ongoing collection of critical data on capacity to enable organisations to coordinate and share resources more quickly and effectively.

PLANNING

Demand modelling to predict and prepare for changing needs

Coordination and preparation will be much more effective with a clear picture of high and emerging needs across the NT.
